## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35
 U.S.C. 102 that form the basis for the rejections under this section made in this
 Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 3-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Foore et al. (Foore), US 2004/0180696.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filling date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the invention of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131 are the effects for purposes or this suit.

Regarding claims 3-32, Foore discloses a code division multiple access user device comprising:

The control of the state of the state of the state of

a CDMA transceivers (see Fig. 1);

a controller connected to said CDMA transceiver (pages 2-3 [0033-0037]);

The transfer compared in Matterial Committee (in Atlanta)
